

To Fix Google Advanced Protection errors, do the following:

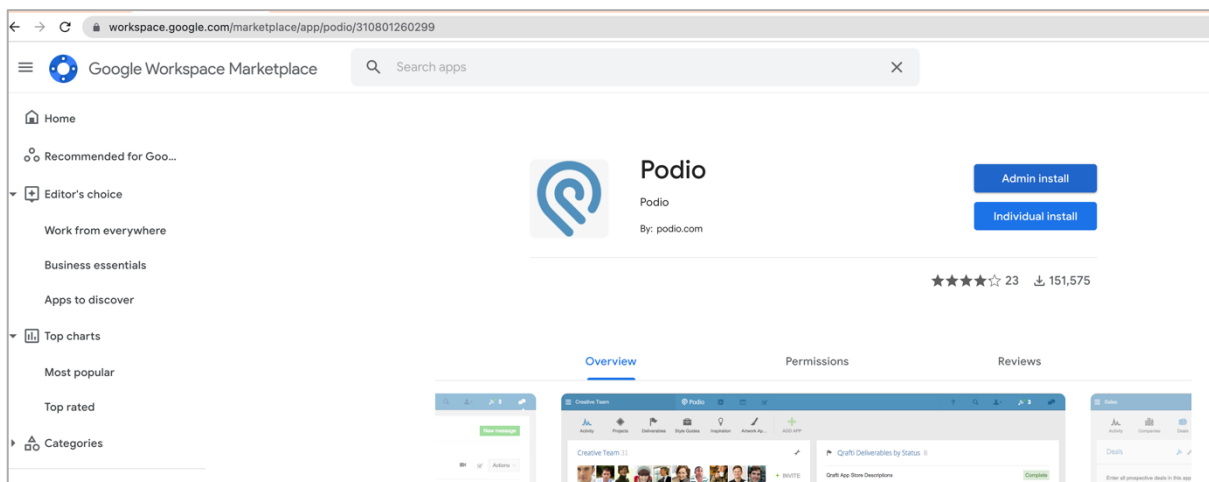

1. Go to <https://admin.google.com/>
2. Go to Apps section -> Google Workspace Marketplace apps

3. Click `Add app to domain install list`

4. You will be redirected to marketplace: <https://workspace.google.com/marketplace>
Search for Podio and select `Admin install`
(<https://workspace.google.com/marketplace/app/podio/310801260299>)

5. On next screen review all the rights, agree to applications terms and conditions, and click finish.

You are granting **Podio** the right to access your data:

-  See, edit, create, and delete all of your Google Drive files (i)
-  View your email messages and settings (i)
-  See, edit, share, and permanently delete all the calendars you can access using Google Calendar (i)
-  See, edit, download, and permanently delete your contacts (i)
-  See info about users on your domain (i)
-  Associate you with your personal info on Google (i)
-  See your primary Google Account email address (i)
-  See your personal info, including any personal info you've made publicly available (i)

Install the app automatically for the following users

- Everyone at your organization
- Certain groups or organizational units
Select users in the next step

I agree to the application's [Terms of Service](#), [Privacy Policy](#), and Google Workspace Marketplace's [Terms of Service](#)

[CANCEL](#) [FINISH](#)

6. Now Podio should be available in your google workspace marketplace (and users should be able to use SSO to login to Podio)
